

Sofia Martinez

UX-Oriented Frontend Engineer | React, TypeScript, Design Systems

Buenos Aires, Argentina | sofia.martinez@example.com | +54 11 5555-0198 | linkedin.com/in/sofia-martinez-ux-fe | github.com/sofia-martinez-ui

Professional Summary

Frontend engineer with 6+ years of experience building accessible, responsive, and high-performing web applications. Strong focus on UX quality, component-driven development, React architecture, and collaboration with product/design teams. Experienced turning Figma designs into production-ready interfaces, improving usability metrics, and building reusable UI foundations.

Core Skills

Frontend	React, TypeScript, JavaScript ES6+, Vite, Next.js basics, HTML5, CSS3, Tailwind, CSS Modules
UX/UI	Figma handoff, wireframes, usability improvements, design systems, accessibility, responsive layouts
State & Data	React Query, Context API, Zustand basics, REST APIs, form state, optimistic UI
Quality	Vitest, React Testing Library, Playwright basics, Storybook, ESLint, performance profiling
Collaboration	Agile teams, product discovery, design reviews, Jira, GitHub pull requests, technical documentation

Professional Experience

Senior Frontend Engineer - NovaCare Digital Health

Remote / Buenos Aires | 2022 - Present

- Led the frontend implementation of a patient onboarding dashboard used by operations teams to review applications, documents, and appointment status.
- Built a reusable component library with React, TypeScript, Storybook, and accessibility guidelines, reducing duplicated UI code by approximately 35%.
- Improved Core Web Vitals by optimizing bundle splitting, memoizing expensive views, and reducing unnecessary re-renders in large tables.
- Partnered with UX designers to convert Figma prototypes into responsive production screens with consistent spacing, typography, and error states.
- Added unit and integration tests with Vitest and React Testing Library for forms, filters, and critical user journeys.

Frontend Developer - FinFlow Payments

Buenos Aires | 2019 - 2022

- Developed React features for merchant onboarding, transaction search, and support workflows integrated with REST APIs.
- Implemented complex forms with validation, loading states, disabled states, and backend error mapping to improve support team efficiency.
- Created reusable table, modal, toast, badge, and empty-state components for internal tools.
- Worked closely with backend engineers to define DTOs, API contracts, and pagination/filtering patterns.
- Improved accessibility by adding semantic HTML, keyboard navigation, focus states, and ARIA labels where appropriate.

UX/UI Frontend Developer - PixelLab Studio

Buenos Aires | 2017 - 2019

- Implemented marketing sites and SaaS product pages from Figma and Sketch designs using React and modern CSS.
- Created responsive layouts for mobile, tablet, and desktop breakpoints with attention to visual polish and usability.
- Collaborated in usability reviews and proposed interface improvements based on analytics and user feedback.

Selected Projects

- **Design System Migration:** migrated a legacy UI to a shared component library using TypeScript, improving consistency and delivery speed.
- **Interview Assistant Prototype:** built a React chat interface with answer submission, evaluation panel, progress state, and report view.
- **Data-heavy Admin Console:** implemented filters, pagination, loading skeletons, and optimistic UI for operational workflows.

Education

Bachelor-equivalent coursework in Interaction Design and Web Development - Universidad Ficticia de Buenos Aires

Certifications: Accessibility Fundamentals, Advanced React Patterns, UX Research Basics

Note: This is a fictional resume created for testing and demo purposes.
