ABOUT

Senior Full-Stack Software Engineer with 20+ years of experience building enterprise Java/Spring Boot systems, React/TypeScript frontends, Kafka-based integrations, and cloud-native applications. Strong background in API design, modernization, troubleshooting, performance optimization, CI/CD, Docker, Kubernetes, AWS, Azure, and pragmatic Agile delivery for distributed teams.

EXPERIENCE

Senior Full-Stack Software Engineer - Enterprise Payroll Platform

Remote | 2025 - Present

- Delivered enterprise-grade full-stack and cloud-native solutions using Java, Spring Boot, React, and TypeScript.
- Worked on microservices, REST API design, modernization, troubleshooting, performance optimization, and AI-assisted delivery workflows.
- Participated in architectural discussions and implemented backend and frontend changes across distributed teams.

Full Stack / Platform Engineer - Digital Consulting Projects

Remote | 2023 - 2025

- Led GitOps-focused platform work using Kubernetes, GitHub Actions, Argo CD, Helm, Terraform, Docker, and AWS.
- Reworked Node.js backend services for platform migration initiatives and supported production delivery pipelines.
- Built proof-of-concept AI integrations using cloud AI services, Node.js webhooks, and modern frontend components.

Full Stack Engineer - Travel and Payments Platform

Remote | 2021 - 2023

- Built Java 17/Spring Boot integrations with external payment, travel, and booking providers.
- Maintained backend services with Maven, AWS, Terraform, and CI/CD pipelines, focusing on reliability and production support.
- Collaborated with cross-functional teams to deliver features safely in a distributed environment.

Full Stack Engineer - High-Traffic E-Commerce Platform

Remote | 2018 - 2021

- Built high-traffic personalization and user-experience services using Java, Docker, Cassandra, Redis, Kafka, Spark, and Scala.
- Supported scalable cross-device experiences during peak traffic events and high-demand commercial campaigns.
- Improved service reliability through monitoring, troubleshooting, and iterative performance tuning.

Senior Java Developer / Architect - Banking Platform

Remote | 2015 - 2018

- Delivered enterprise banking features in Scrum teams, estimating technical risk, impact, and delivery effort.
- Worked with Java, Maven, JPA, Hibernate, Quartz, Jenkins, OSGi, and enterprise middleware integrations.
- Contributed to architecture decisions and implementation planning for business-critical systems.

SKILLS

Backend: Java 21, Spring Boot, REST APIs, Microservices, Kafka, Maven, JPA, Hibernate

Frontend: React, TypeScript, JavaScript, Node.js, Vite

Cloud/DevOps: AWS, Azure, Docker, Kubernetes, OpenShift, Terraform, GitHub Actions, Argo CD, Helm, CI/CD

AI/Data: AI-assisted development, cloud AI services, data platforms, prompt-driven workflows

CERTIFICATIONS & EDUCATION

Certifications: Cloud data engineering certification, Kubernetes hands-on training, Java programming certification

Education: Analyst Degree in Computer Science, Major University
